

“At least 25% of a building’s energy savings potential comes from the way the building is used and managed.”

Through education, ESU can help building operators gain the knowledge needed to:

- Operate the building in an energy efficient manner.
- Maintain the building for optimum performance and prolong equipment life.
- Address changes in building use, equipment, and control strategies.

**A Skilled Operator
Plus Good Technology
Equals
A Well Performing Building**

About ESU

In 2007, Environmental Systems Inc committed to the establishment of Environmental Systems University (ESU). ESU is not a brick and mortar institution, but a corporate learning initiative that strives to provide an umbrella for developing and educating employees, customers, and suppliers.

Rather than simply providing internal training programs, ESU seeks to engage the wider organization in continuous learning, professional growth, and organizational effectiveness. Moreover, ESU is committed to continuously improving the company’s business systems and processes, resulting in consistent and excellent services provided to our internal and external customers.

**Developing Knowledge,
Adding Value**

Environmental Systems Inc.
Waukesha, WI

Certifications & Technical Training Programs

- LEED-Accredited Professionals
- Tridium Certified Niagara Training Partner
- Multi-Vendor Systems Integration
- Safety & Security
- NICET Fire Alarm Level II
- Mechanical Engineering Level I
- Mechanical Service
- NATE
- Universal EPA

Applications Training

- Energy Management
- Energy Analysis
- Fault Detection & Diagnostics
- Work Order Management
- Steam Trap Performance Monitoring
- Indoor Air Quality
- Lighting Control
- Pneumatic Systems
- Security & Life Safety

Building Operator Training

- Building Systems
- Building Commissioning
- Energy Conservation Techniques
- Operation & Maintenance for Sustainable Buildings
- Automation & Demand Reduction
- Indoor Air Quality
- Water Efficiencies
- HVAC Systems and Controls
- Electrical Control Circuits, Motors, and Electrical Diagnostics
- Efficient Lighting Systems
- Facility Electrical Systems
- Preventive Maintenance and Troubleshooting Principles

Tridium Certified Niagara^{AX} Training Partner

- Niagara^{AX} Certification
- Niagara R2 Certification
- Niagara End-User
- Vykon Energy Suite
- Vykon Security
