

Imagine what your organization could do with

\$60,000
every year!

.....
STIMULUS DOLLARS.

UTILITY REBATES.

TAX INCENTIVES.

ESI can help your company benefit from these opportunities.
.....

Environmental Systems, Inc. (ESI) is a Wisconsin-based industry leader known nationally for providing innovative solutions in energy conservation. Our ongoing commitment to helping our customers achieve quality, cost-effective results has made us experts in leveraging available incentives and credits for public and private entities. ESI's list of satisfied customers includes numerous facilities for city government, universities, school districts and private businesses.

ESI works from the understanding that the "building is a system." Our systematic process evaluates a structure's energy consuming systems and identifies every opportunity to cost effectively optimize its efficiency. That combined with our knowledge of how to help your organization take advantage of every available savings incentive program adds up to dramatic, ongoing cost savings.

ESI's goal is to help you provide safe, comfortable, productive, sustainable building performance at the lowest total cost of operation. We enable you to maximize your investment over the entire life cycle of your systems via superior solutions and services.

"Cost savings have already been substantial...in January alone, we saw a savings of almost \$7,000."

- RICHARD VETTING Director of Buildings
& Grounds, Valders Area School District

> Read how ESI helped Valders Area School District save \$60,000 yearly.
